01 PROFILE

Computer Science and Engineering student building research-driven AI systems, secure applications, and practical software. Current interests include reliable machine learning, explainable AI, deep learning, agentic workflows, penetration testing, IoT security, and microwave / antenna sensing. I value reproducible experiments, clear evidence, and responsible technical practice.

02 SELECTED RESEARCH & PROJECTS

AI / CLINICAL TABULAR LEARNING THYRO-RIFT Missingness-aware, reliability-informed feature transformer for thyroid prediction, with held-out evaluation, cross-validation, baselines, ablations, robustness tests, calibration, and external validation.	MICROWAVE / METAMATERIAL RESEARCH Dual-Band Metamaterial Sensor CST-validated dual-band metamaterial sensor for sandy and loamy soil-moisture sensing, with resonance calibration, field analysis, and preliminary machine-learning interpretation. Pending acceptance.
CYBERSECURITY / PENETRATION TESTING ICE Security Lab Authorized lab practice covering reconnaissance, SMB enumeration, MS17-010 validation, controlled exploitation, session handling, and evidence capture in a Windows 7 test environment.	ANDROID / FIREBASE FoodMoboChain Mobile food-service workflow covering authentication, discovery, ordering, and real-time data operations with Android, Java, and Firebase.
JAVAFX / MYSQL Real Madrid Club Management Desktop management system for players, matches, transfers, training, and performance records, structured with JavaFX, FXML, Maven, and MySQL.	JAVAFX / MYSQL Assignment Writer Hire Course project implementing login, assignment requests, writer discovery, hiring, order tracking, and history with service interfaces and MySQL CRUD workflows.

PROGRAMMING

C, C++, Java, JavaScript, TypeScript, SQL

WEB

HTML, CSS, React, Bootstrap, Tailwind CSS

DATABASES

MySQL, SQLite, PostgreSQL, Firebase

AI / DATA

Machine learning, deep learning, XAI, GAN, GNN, model evaluation

RESEARCH

Agentic AI, federated learning, calibration, robustness, experiment design

SYSTEMS

Android Studio, JavaFX, IoT, cybersecurity, penetration testing

PROBLEM SOLVING

Data structures, algorithms, competitive programming, Codeforces

EMERGING FOCUS

Microwave / antenna systems, metamaterials, THz sensing, edge intelligence

2023 — PRESENT	BSE in Computer Science & Engineering	Southeast University
2021	Higher Secondary Certificate · Science	Dhaka City College
COMPLETED	Secondary School Certificate · Science	Bozra M.L. High School

VERIFIED CERTIFICATES

- Applied Penetration Testing Engineer: Hands-on — score 94, Certificate ID 4940 (2026)
- C/PTE: Certified Penetration Testing Engineer (2026)

ADDITIONAL PROJECTS

- Firebase CRUD Application — Android / Firebase
- Bank Management — JavaFX / SQLite
- Fruit Market — JavaFX storefront UI
- DhakaStreetPlastic — collaborative urban image-dataset project

PORTFOLIO / Project repositories, manuscripts, certificates, and source archives are available through the portfolio website.
